

PAWLIK AT A GLANCE

Since 1996, PAWLIK Consultants helps clients throughout the world translate their company goals into concrete results. How? By aligning the often disparate areas of strategy, organization, people and culture, resolving any tension and creating a cohesive whole. The systemic approach to organizational and people development enables the consultancy to flexibly address the individual needs and challenges of its clients. PAWLIK boasts a staff of 150 specialists, all highly accomplished in their specific fields and yet all far-sighted and integrative in their mindsets and methods. Their goal is to deliver sound, sustainable results. PAWLIK therefore bases its work on cutting-edge neurobiological and psychological research findings, combining these with its staff's extensive, highly varied project expertise.
